Glue problems occur when artwork bleeds off the page

Lorem ipsum dolor sit amet, consectetuer

Lorem ipsum dolor sit amet, consectetuer

Fig 1 - ARTWORK BLEEDS OFF INTO GLUE EDGE

Fig 2 - ARTWORK DOESN'T BLEED INTO GLUE EDGE

- Please be aware that if the artwork bleeds off the sheet on the glue edge, it will compromise the glue strength.
- Gluing can cause the sheets of the pad to come loose due to ink reacting with the glue.
- To avoid this problem a blank or 'safe zone' should be left (as shown on the right)
